**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8-10 are dependant from claim 11. There is no claim 11 in the claims. The claims appear to stop at claim 10. Therefore it is not know where these claims depend from.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tomesko.

Tomesko teaches an apparatus for blocking a workpiece during lens manufacturing, the apparatus comprising a work-piece holder, 20, which is a seat, for receiving the workpiece, 34, which is an unprocessed lens, a block, 36, for interfacing with the work piece based on a predetermined pressure, wherein the predetermined pressure is applied on the block, (col. 4, lines 10-23), and the work piece holder

Art Unit: 3723

including a floating mechanism, for floating on a stage, (col. 15, lines 6-9), and a plurality of air spaces that enable regulating air pressure inside the work piece holder, (col. 3, lines 60-64).

Claims 6,7 are rejected under 35 U.S.C. 102(b) as being anticipated by Savoie.

Savoie teaches a method for blocking a work piece during a lens manufacturing process comprising aligning a work piece holder with respect to a fixture, wherein the work piece holder includes the work piece, and positioning the work piece using a predetermined pressure applied on the fixture, and determining an axial position of the work piece holding device with respect to a fixture, aligning the work piece holding device using the determined axial position and positioning the fixture on the work piece using a predetermined pressure applied on the fixture, (col. 16, line 19 – col. 18, line 16).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ruscio et al. was cited to show another example of a lens manufacturing device.
